Recommended period: from April to November

Strolling in one of the most magical peaks of the Apennines, Monte Sibilla, which gives its name to the entire Sibillini chain. It takes its name from the Apennine Sibyl, the mythical inhabitant of the homonymous cave, which for centuries has permeated the mountain of an aura of legends and mystery. Once on the way, the path is uncovered and rocky, although not demanding, it only requires a little training. During the journey we will immerse ourselves in the history of these mountains, in the numerous legends and stories, and we will be careful in observing the typical flora and fauna on these reliefs. After passing the rocky stretch of the crown of the Mount Sibilla, which will be the most challenging of the whole route, the rise continues steep, but gently on grassy ground and the panorama that will be waiting for us will give us very deep emotions, since we will have all the Sibillini chain in front of our eyes.

The dirt road to get to the starting point is accessible by normal cars. You have to be a little careful and it is recommended to arrive with a slightly "high" car, an off-road vehicle is not necessary, but for example, very low models such as the Golf, they may have some difficulties.

The road leads to the Sibilla Refuge where you can park, 1540mt. Difficulty E (Hikers). No dogs allowed.

Meeting point at Sibilla Refuge at 10.00 am.
